Dear reader,

Welcome to the second issue of the Transport Research and Innovation Monitoring and Information System (TRIMIS) newsletter.

TRIMIS is an online platform for researchers to share and discuss innovation in mobility in Europe. It is an evolution of the Transport Research & Innovation Portal (TRIP), and incorporates TRIP’s database of over 10,000 EU and national transport research projects.

TRIMIS will support the EU’s Strategic Transport Research and Innovation Agenda (STRIA), and enable analysis of the effectiveness of transport innovation in delivering the EU’s energy and transport strategy.

Please visit the TRIMIS website to find out more, and share information on European transport research and innovation.

Kind regards,
The TRIMIS team
