Review of published climate change adaptation and mitigation measures related with water

Tiina Nöges, Peeter Nöges, Ana Cristina Cardoso

LB-NA-24682-EN-Z

The mission of the JRC is to provide customer-driven scientific and technical support for the conception, development, implementation and monitoring of EU policies. As a service of the European Commission, the JRC functions as a reference centre of science and technology for the Union. Close to the policy-making process, it serves the common interest of the Member States, while being independent of special interests, whether private or national.

The database holds a collection of about 450 climate change adaptation and mitigation measures compiled from various published sources.

The list of measures can be filtered by economic sector, type of intervention, main purpose, water category, pressure addressed, precaution level, and country.
